

Imitation DomeCam

Imitation Security Camera

- Authentic styling
- Maintenance free - no batteries needed
- Easily mountable
- Compact and easy to install

Imitation DomeCam

Imitation Security Camera

the freedom to observe...

Now you can have the look of an expensive video surveillance system, without the high costs usually involved! Fool intruders with the Swann Imitation DomeCam, and by giving them the illusion that they are being watched and recorded. Even under close inspection, the authentic styling of the Swann Imitation DomeCam makes it impossible to differentiate it from real security cameras.

The Swann Imitation DomeCam is a great way to give the impression of having installed a sophisticated security system without incurring the high costs of installing and maintaining a real security system.

It easily mounts anywhere - on the ceiling or wall under entrances, hallways, indoors or even outdoors.

The lack of blinking lights alleviates the hassle of changing batteries. Try installing Swann Imitation

DomeCams with real Swann DomeCams, to give double impression of a security system, at a fraction of the cost!
